

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24400

Stream : Smith Ditch

Applicant : City of Crown Point
Bill Meeks
101 North East Street
Crown Point, IN 46307-4027

Description : Two existing 36" corrugated HDPE pipe culverts carrying Stillwater Parkway and Greenview Place over the ditch will be replaced with a new box culvert system to reduce upstream flood damages. The new crossings will consist of one 12' by 5' box centered in the channel with two 12' by 4' concrete box culverts positioned on either side. The new culverts will be skewed to align with the stream flow. Minor channel shaping will occur both downstream and upstream of the new culvert to improve the flow transition at the crossing. The reshaped areas will be stabilized with an 18" thick layer of limestone riprap placed over geo-textile fabric. The crown of the roadway over the new culverts will be at 701.2', NGVD on Stillwater Parkway and 700.2', NGVD on Greenview Place. Additionally, an unpermitted stream crossing, Crooked Creek Trail, consisting of two 36" RCP culverts with a road constructed on fill placed to a height of 8' over existing elevations will be replaced with one 12' (span) by 5' rise by 50' length concrete box culvert centered in the channel with two smaller culverts positioned on either side. The new box culverts will have side-tapered inlets. The upstream invert of the two smaller culverts will have an elevation of 696.1' (NGVD29). The larger culvert will have an upstream invert of 695.1' (NGVD29). The proposed top of the road elevation will be 704.0' (NGVD29). Minor channel shaping, confined to the construction right of way, will occur just upstream and downstream of the crossing to provide better flow transition into and out of the culvert system. The shaped areas will be lined with a layer of riprap placed over a geo-textile fabric. Details of the project are contained in information and plans received at the Division of Water on July 3, 2007 and September 27, 2007.

Location : At the Greenview Place and Stillwater Parkway stream crossings
DOWNSTREAM: near Crown Point, Center Township, Lake County

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24483

Stream : Britton Branch

Applicant : Britton Park Developers, LLC
Ryan Thomas
1212 East 38th Street
Indianapolis, IN 46205-2807

Description : The existing 9' by 6' by 180' culvert crossing carrying State Road 37 over Britton Branch (Krause-Klepfer Drain) will be extended by 12' at the upstream end of the structure. The extended culvert will maintain the existing upstream invert elevation of 798.25', NAVD 88. The inlet end of the culvert will be beveled. The culvert and headwalls will maintain the existing skew of 32 degrees and 31 minutes. Minor channel shaping will occur at the upstream end of the extended culvert to improve the flow transition at the crossing. The shaping will be confined to the construction right-of-way. The reshaped areas will be stabilized with a 48" thick layer of limestone riprap placed over geotextile fabric. New steel W-beam guardrails will be placed along this side of the roadway over the extended channel. Details of the project are contained in information and plans received at the Division of Water on September 27, 2007.

Location : At the SR 37 stream crossing
near Fishers, Delaware Township, Hamilton County

30 Day Public Notice Report

Application # : FW-24528

Stream : Grassy Branch

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing culvert carrying SR 32 over Grassy Branch (Anna Kendall Legal Drain) will be extended approximately 31' downstream and 40' upstream. Headwalls are not anticipated because the ends of the culvert will extend outside of the required roadway clear zone. The new upstream and downstream invert elevations will be 889.50' and 889.15', respectively. Riprap will be placed in the channel at the extended culvert inlet and outlet in order to dissipate energy, reduce velocity, and thus reduce erosion and scour. Approximately 9.5 cubic yards of revetment riprap over geotextiles will be placed for bank stabilization and scour protection. The channel work, consisting of riprap placed over geotextile fabric, will extend 12' upstream and 11' downstream of the culvert. The crown of the roadway over the extended culvert will be 901.20'. Details of the project are contained in information and plans received at the Division of Water on October 4, 2007.

Location : Beginning approximately 75' north of the State Road 32 stream crossing and extending downstream approximately 150'
DOWNSTREAM: near Westfield, Washington Township, Hamilton County
NE¼, NE¼, NE¼, Section 2, T 18N, R 3E, Westfield Quadrangle

30 Day Public Notice Report

Application # : FW-24530

Stream : St. Joseph River

Applicant : Elkhart County Highway Department
Jeff Taylor, PE
610 Steury Avenue
Goshen, IN 46528-3011

Description : A new bridge will be constructed over St. Joseph River to carry the southbound lanes of Johnson Street across the river. The new structure will be a 2-span continuous composite steel girder bridge with span lengths of 184.17' and 199.25'. The structure will have an out-to-out length of 387.42' and a clear roadway width varying from 45.17' to 45.4'. The spill through abutments will be full-height. The abutments and piers will be skewed 90 degrees to align with streamflow. Riprap placed over geotextile fabric will be placed around the single pier. In addition, the existing 4-span continuous composite prestressed concrete I-beam bridge will be rehabilitated and converted to carry the northbound lanes of Johnson Street across the river. Temporary cofferdams will be constructed around the pier and abutments to allow the excavation, fill, and construction to be completed under dry conditions. A temporary work bridge will be constructed to the west end of the existing southbound bridge to the proposed center pier location. The temporary cofferdams and temporary work bridge will be removed upon completion of the project. Details of the project are contained in information and plans received at the Division of Water on October 4, 2007, October 24, 2007 and October 26, 2007.

30 Day Public Notice Report

Application # : FW-24537

Stream : Curtis Creek

Applicant : Jasper County Surveyor
Kevin M Arnold
115 West Washington Street, Suite 110
Rensselaer, IN 47978-2829

Newton County Surveyor
Chris Knochel
310 North 7th Street
PO Box 126
Kentland, IN 47951-0126

Description : The proposed project involves clearing debris and trees that block the stream flow and removing a couple feet of sediment from the bottom of the ditch. The total project length will be approximately 14 miles. Dredged material removed from Curtis Creek Regulated drain within the assumed wetland area from approximate Station 660+00 to 690+59 is to be removed and hauled off on temporary wetland crossing mats and deposited on the existing spoil banks upstream from approximate Station 500+00 to 515+00. The spoil shall be placed on existing spoil banks within the regulated drainage easement. Details of the project are contained in information received electronically at the Division of Water on October 9, 2007 and in plans and information received at the Division of Water on October 24, 2007.

Location : At the confluence of the Iroquois River in Jasper County extending upstream approximately 14 miles to County Road 500 North in Newton County

30 Day Public Notice Report

Application # : FW-24542

Stream : Honey Creek

Applicant : Zinkan and Barker Inc
Steve Zinkan
5332 North Temple Avenue
Indianapolis, IN 46220-3644

Description : Approximately 40' of Honey Creek's stream banks and approximately 100' of an unnamed tributary's stream banks will be stabilized with hand-placed riprap over geotextile fabric in order to protect the bank. The riprap will be keyed into the streambed at its base and will conform to the stream bank, maintaining a 2:1 slope where practical. It will have a maximum height of approximately 6', a maximum streamward projection of 18", and bank slopes that match the existing bank. Details of the project are contained in information and plans received at the Division of Water on October 10, 2007.

Location : Beginning approximately 315' upstream of the State Road 135 stream crossing and extending approximately 200' upstream and 400' south
near Bargersville, White River Township, Johnson County
SW¼, NW¼, SW¼, Section 13, T 13N, R 3E, Bargersville Quadrangle

30 Day Public Notice Report

Application # : FW-24545

Stream : Fountain Creek

Applicant : Fountain City WWTP
P.O. Box 312
Fountain City, IN 47341-0312

Description : An 8" diameter effluent line will be placed beneath the stream. The line will have 3' of cover between its encasement and the streambed and 3' of cover in the banks. The line will have a 4" concrete encasement for the section below the streambed. A tapping tee and valve will be connected to the existing 8" effluent line and will run west and south to a proposed discharge point into Nolands Fork. Details of the project are contained in information and plans received at the Division of Water on October 11, 2007.

Location : Approximately 900' southwest of the US 27 and Whitewater Road intersection at Fountain City, New Garden Township, Wayne County
NW¼, NW¼, Section 12, T 17N, R 14E, Fountain City Quadrangle
Quad Code: 3908488

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24547

Stream : Nolands Fork

Applicant : Fountain City WWTP
P.O. Box 312
Fountain City, IN 47341-0312

Description : An 8" effluent line will be installed 5' below existing grade along Nolands Fork and bored below US 27 for a total length of approximately 2010' to an existing discharge point at Fountain Creek. A 15' wide stone access drive will be constructed over the proposed effluent line. Fill will be required along portions of the proposed access drive. In addition, a 42' by 3' weir will be constructed across the stream at the proposed outfall location. Riprap will extend 12' on either side of the weir. A proposed pump station will be constructed as well. Details of the project are contained in information and plans received at the Division of Water on October 11, 2007.

Location : Approximately 900' southwest of the US 27 and Whitewater Road intersection near Fountain City, New Garden Township, Wayne County

Application # : FW-24572

Stream : Grassy Creek

Applicant : Town of New Whiteland
Public Works Superintendent
Jim Lasiter
401 Mooreland Drive
New Whiteland, IN 46184-1246

Description : The Town of New Whiteland has donated an 11 acre site as the future home of Proctor Park. This park will serve as a living classroom where families will read the names and stories of local heroes, military, police, fire, & EMS people who sacrifice unselfishly to protect and serve our communities and our country. The park will be constructed along the east bank of Grassy Creek (Tracy Ditch) within the Tracy Commons Subdivision. The park will include the construction of a memorial area and two playground areas with paths, benches, and landscaping around each. There are no proposed modifications to the existing channel and all open areas will be restored to the pre-disturbance ground condition and elevation following construction. Detail plans and project information has been submitted with the application package for review and approval. Details of the project are contained in information received electronically at the Division of Water on October 26, 2007 and in plans and information received at the Division of Water on

Location : In the floodway along the east bank of Grassy Creek (Tracy Ditch) beginning upstream at the Tracy Road (CR 600 North) crossing and extending downstream approximately 1,265'

Application # : PL-20904

Lake : Sylvan Lake

Applicant : Kevin J. Konrath
1165 Pleasant Point
Rome City, IN 46784-9645

Description : A new underwater beach will be constructed in front of the property of the applicant on Sylvan Lake to provide an area to swim. The beach will consist of a 2" to 4" thick layer of (7/64 inch clean, washed pea gravel/sand) placed directly on the lakebed. The beach will begin approximately 20' north of the northern property line and will extend 80' across the 100' frontage. It will have a maximum lakeward projection of 1' or a depth of 5' below the legal/average normal level of the lake. Details of the project are contained in information received electronically at the Division of Water on October 26, 2007 and in plans and information received at the Division of Water on

Location : 1165 Pleasant Point ; Lots 7 and 8 in Beechwood Addition to Sylvan Lake
at Rome City, Orange Township, Noble County

Statute/Rule : Lakes Preservation Act, IC 14-26-2, with the associated Public Freshwater Lake Rule, 312 IAC 11

Application # : PL-20906

Lake : Lake Wawasee

Applicant : Chris Ganshorn
8085 East Constitution Drive
Syracuse, IN 46567-9360

Description : A new underwater beach will be constructed in front of the property of the applicant on Lake Wawasee to provide a suitable area for swimming. The beach will consist of a 4" to 6" thick layer of (7/64 inch clean, washed pea gravel/sand) placed directly on the lakebed. The beach will begin approximately 35' (west) of the (eastern) property line and (will extend) (westerly) across 18' of the 90' frontage. It will have a maximum lakeward projection of 10'. A concrete retaining wall will be added along 3 sides. It will go back 10' into property and then go 12' to the east then go back 10' to existing seawall. The retaining wall will be 3' deep and have a 12" top. Details of the project are contained in information received electronically at the Division of Water on November 1, 2007 and in plans and information received at the Division of Water on

Location : Northern side of wawasee lake, on a channel off of Johnson bay. In Kosciusko county, in Turkey Creek township, near the town of Syracuse.
